Overview

Prepared Edge Class Using Appliquick Tools by Leslee Price

This class will demonstrate all the steps needed to prepare your appliqué pieces using the Appliquick method.

This technique will be demonstrated step by step and you will actually complete all the pieces of a flower pattern, including adhering it to a background block ready to appliqué by hand or machine. The actual appliquéing will not be done in class.

ITEMS TO BRING TO CLASS: (these are available at Painted Pony if you don't have them)

\$6.00 kit – contains fabric and pattern for project, 1 sheet Print & Piece Fuse Lite, and handouts

Appliquick Tools – these run approx. \$49.00. (stainless steel rods; fork on one allows you to hold the small piece in place while the other beveled rod is used for manipulating the fabric over the edge of the foundation paper)

Washable work surface (I have used an appliqué sheet and also a cutting mat - glue WILL get on it. There is a special black mat that I now use and highly recommend.)

Pencil (I use a mechanical pencil for accuracy when tracing)

Glue Pen AND refills - (I use *Sew Line* or *Quilter's Select* - the glue must be water soluble and safe for fabric)

Fabric Glue - (I use *Jillily's Appli-Glue* but *Roxanne's Glue-Baste-It* works, too. It also must be water soluble and safe for fabric)

Small (4 or 4 1/2") serrated scissors (I use the green handled ones by Karen Kay Buckley)

OPTIONAL ITEMS

Light box (PP'nQ does have one you can share if you don't have one, but if you plan to do a lot of appliqué, I'd highly recommend you get one)

Wooden glue holder (very handy - I'll show you in class)

Note: I have a pattern available to make a holder for your Appliquick tools if you are interested.
